

New Technology Offers First Ever Simulator for Less Lethal Training

PHILADELPHIA - announces the launch of the Less Lethal . This is the first interactive training simulator of its kind offering multiple "less lethal" capabilities. It provides a tool for law enforcement agencies to train their officers on a wider range of firearms and equipment in the use-of-force continuum.

The new system features "less lethal" weapons including , and Bean Bag (shotgun). Also included in this new release is an authoring tool that features an improved Wizard, giving officers the ability to put in gun flashes and offer more scenario choices in branching; and on the practice page, the user can put in his or her own static target.

"This new set of tools takes simulator training to a new level," says Tim May, CEO of Advanced Interactive Systems, Inc. "This will save lives by giving officers the ability to train with all of their equipment in real-life scenarios."

About AIS

AIS Inc. is a global company providing comprehensive training solutions for people in positions where lives are on the line, including the areas of law enforcement, military, government, security, aviation and first responders. AIS has delivered training programs to groups as large as 26,000. Its interactive simulation systems and synthetic environments provide reality-based training in weapons handling and judgment skills, chem-bio and other hazard response tasks, as well as first responder challenges. Based in Seattle, Washington, AIS Inc. is a privately-owned company with offices in Monterey, California; Orlando, Florida; Washington, D.C., Abu Dhabi, UAE; and the United Kingdom.
